It is our distinct pleasure to invite you to attend the 7th international conference ‘New Horizons of Transport and Communications 2019’. The Conference will be held on November 29-30, 2019 in Doboj, Republic of Srpska, Bosnia and Herzegovina, at the Faculty of Transport and Traffic Engineering, University of East Sarajevo.

Transport and communications present a bloodstream of a society, system, country. Therefore, we can say that current level and development in transport and traffic significantly determine level of society development as a whole. If transport and traffic development does not follow society development then it becomes its limiting factor. In order to justify a role of an economy impeller it needs to grow constantly and adapt to current and future challenges. Conference attendees will have the chance to present their work on current traffic policy, sustainability and development strategy in the field of transport and traffic engineering, examples of good practice worldwide, solutions of respective problems in transport, scientific results, new models of technology and other achievements.

On behalf of the Organizing Committee we think that New Horizons 2019 will again be a memorable event. We hope you will enjoy the meeting and we are looking forward to welcoming you to Doboj in 2019.
